

## Mean CAR(0,1) by SCRisk quintile

Full eligible sample: 52,533 calls, 2,026 firms. Variables winsorized at 1% and 99%.

Tied blocks receive equal proportional membership; masses are equal within each SIC division and nested sort.

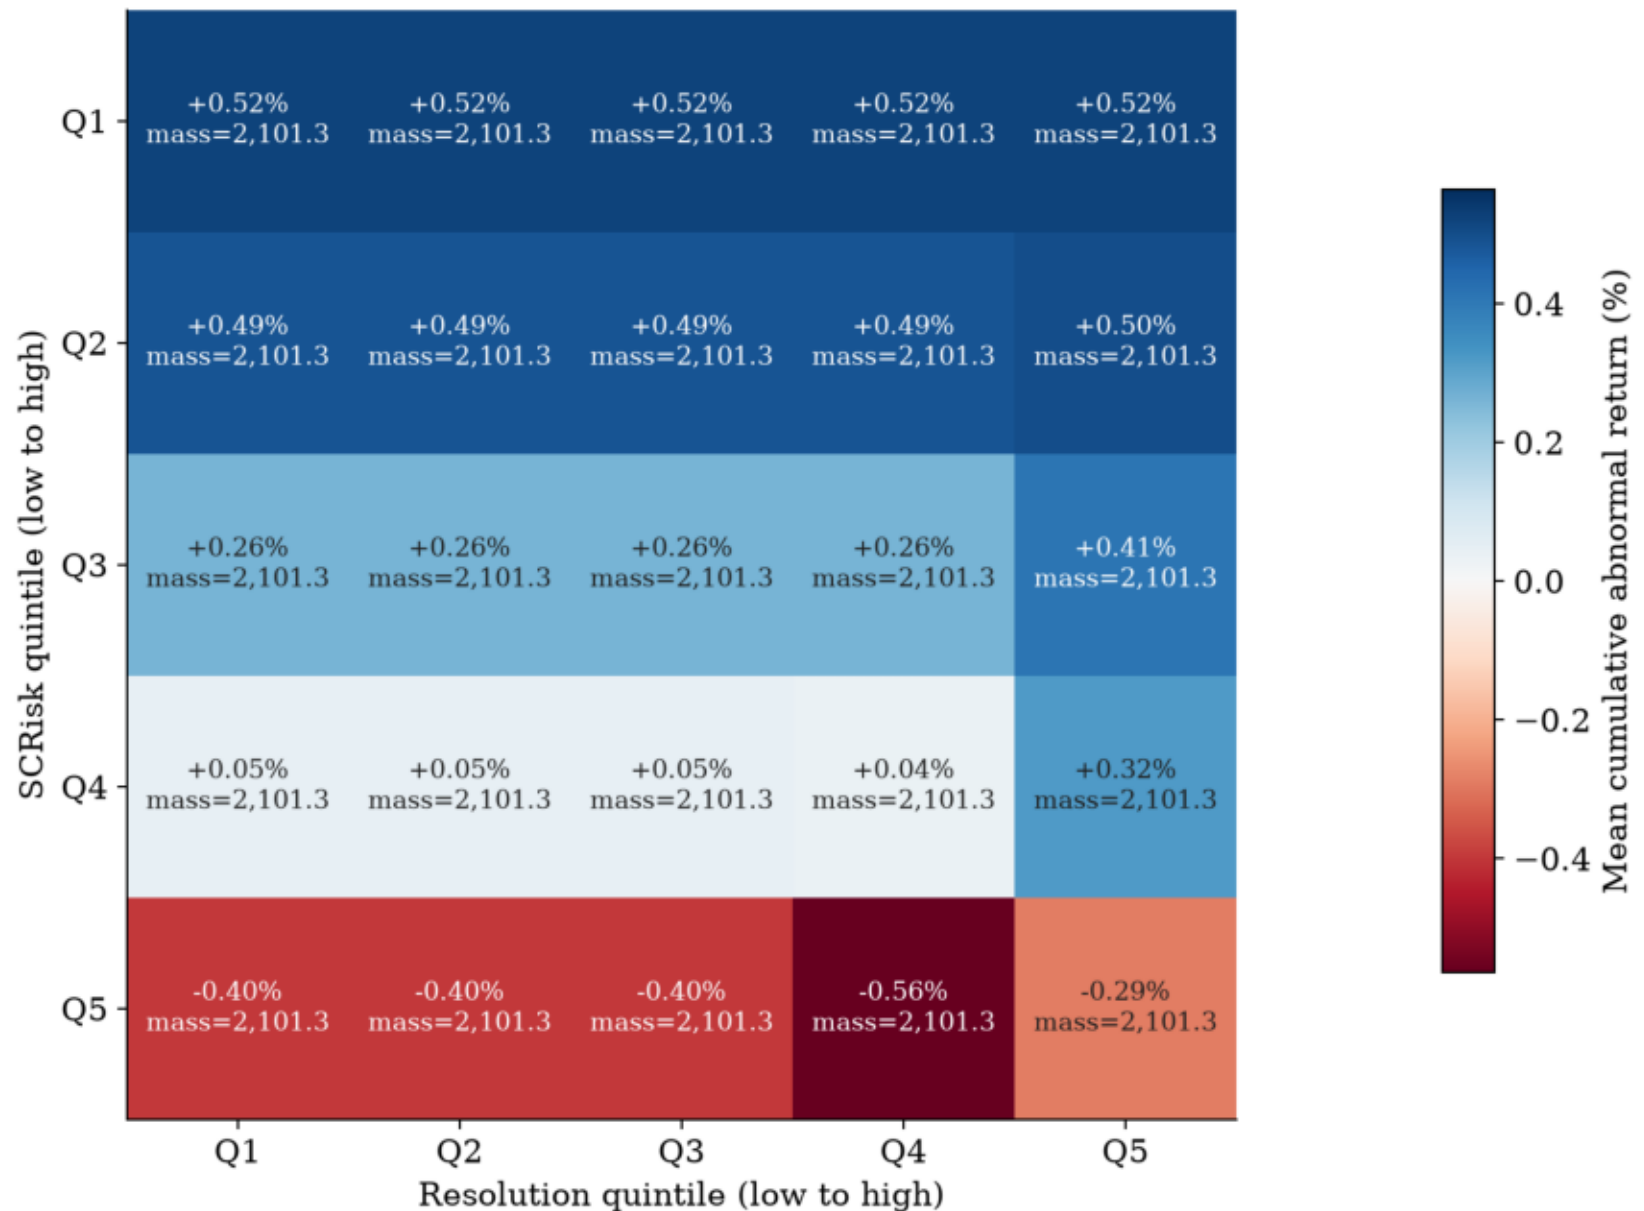

## Mean CAR(0,1) by Resolution quintile

Full eligible sample: 52,533 calls, 2,026 firms. Variables winsorized at 1% and 99%.

Tied blocks receive equal proportional membership; masses are equal within each SIC division and nested sort.

## Mean CAR(0,1): SCRisk x Resolution

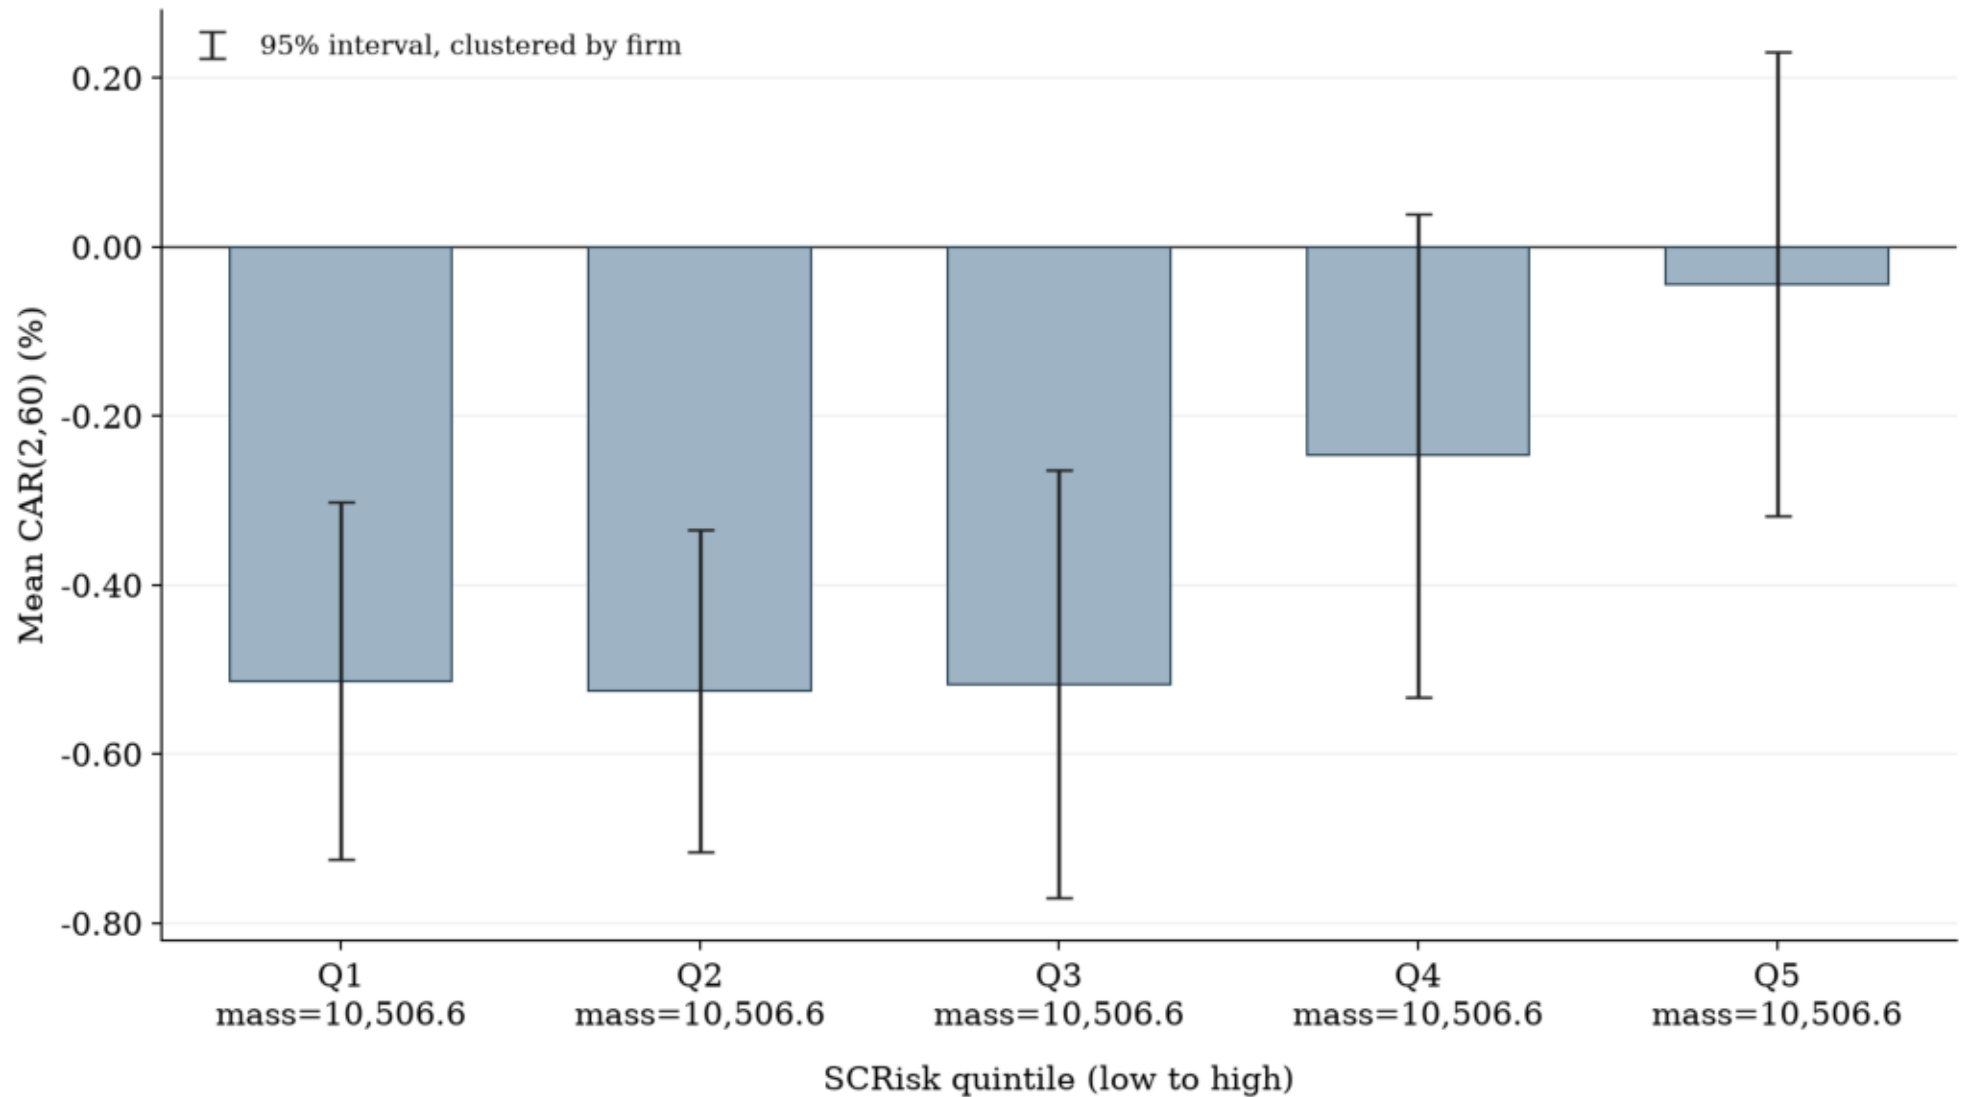

Full eligible sample: 52,533 calls, 2,026 firms. Variables winsorized at 1% and 99%.

Tied blocks receive equal proportional membership; masses are equal within each SIC division and nested sort.

Cell intervals omitted for readability; bar panels show firm-clustered 95% intervals.

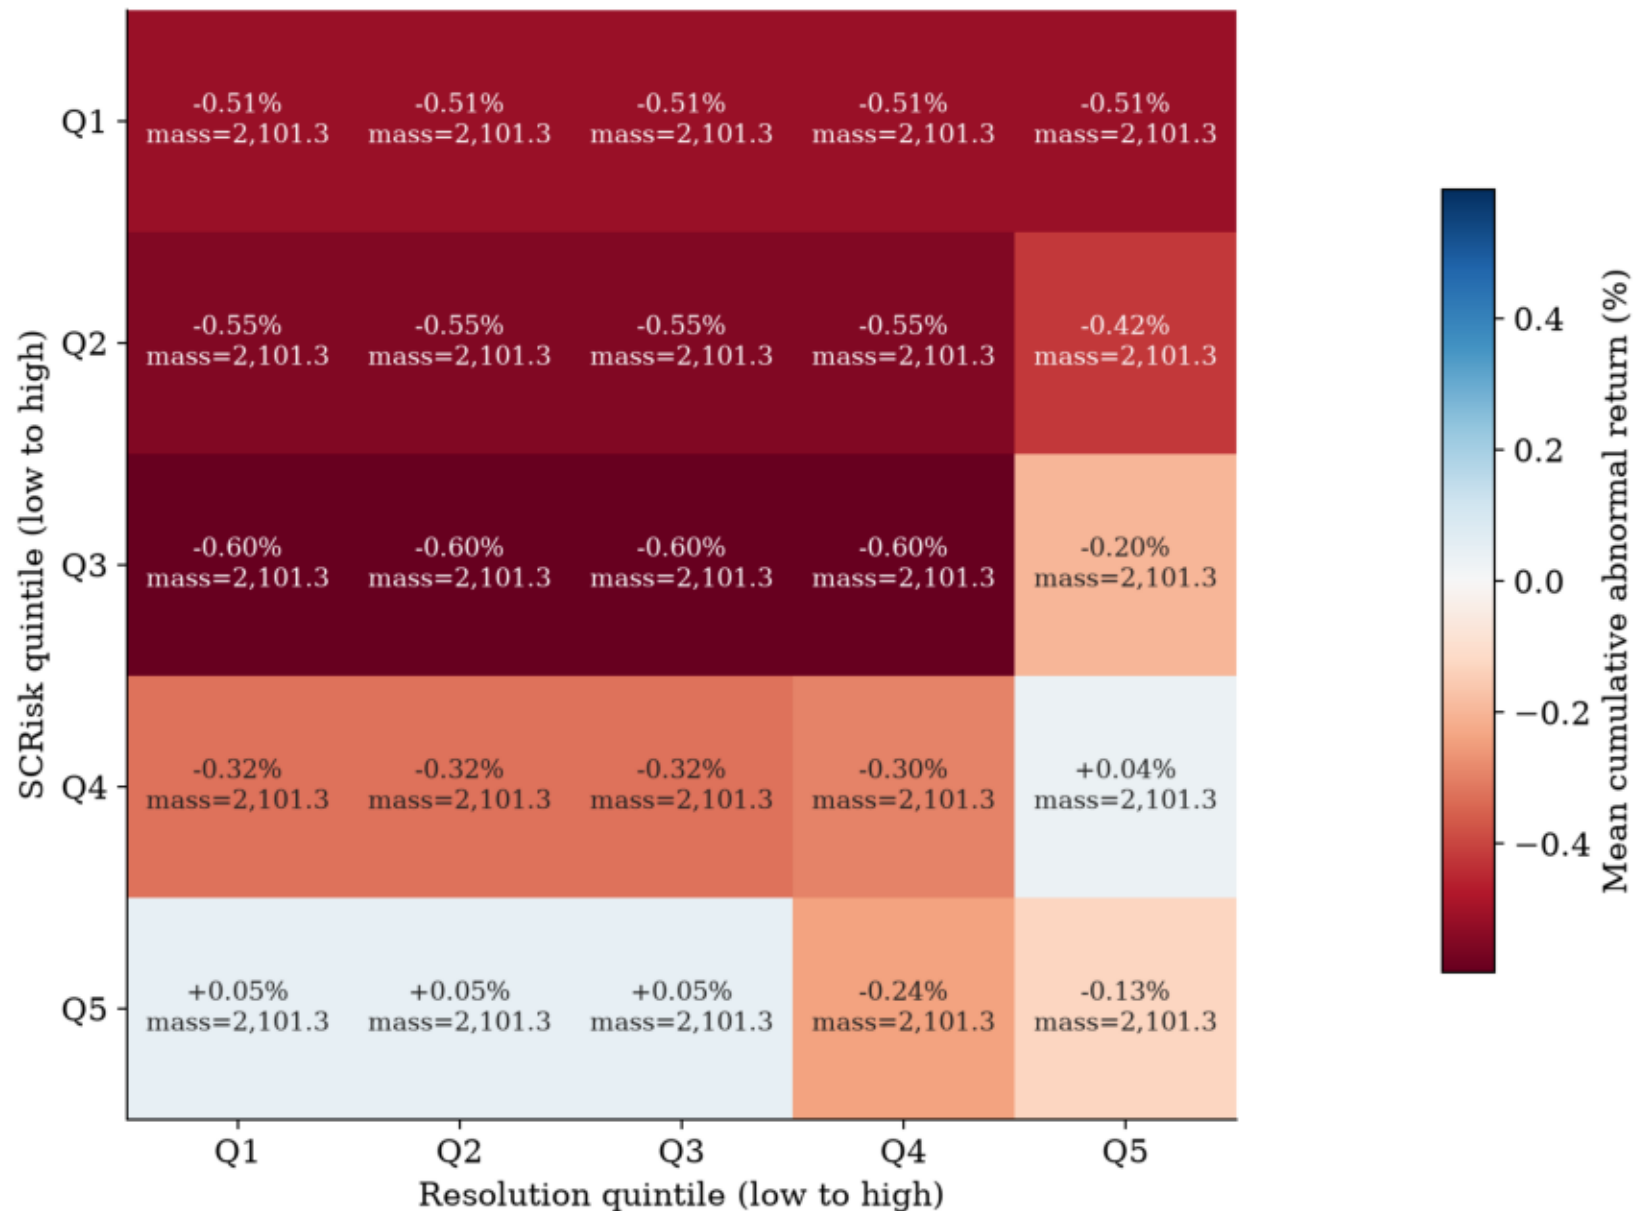

## Mean CAR(2,60) by SCRisk quintile

Full eligible sample: 52,533 calls, 2,026 firms. Variables winsorized at 1% and 99%.

Tied blocks receive equal proportional membership; masses are equal within each SIC division and nested sort.

## Mean CAR(2,60): SCRisk x Resolution

Full eligible sample: 52,533 calls, 2,026 firms. Variables winsorized at 1% and 99%.

Tied blocks receive equal proportional membership; masses are equal within each SIC division and nested sort.

Cell intervals omitted for readability; bar panels show firm-clustered 95% intervals.
