

Hardware portfolio: SCRisk, Resolution and announcement CARs

Planned regression extension following descriptive exploration

	M1	M2	M3 (primary)	R1: no FY2010
SCRisk	-0.6183	-0.7123	-0.8227	-0.8386
Cluster SE	(0.0830)	(0.0882)	(0.1065)	(0.1098)
95% t interval	[-0.782, -0.455]	[-0.886, -0.539]	[-1.032, -0.613]	[-1.054, -0.623]
p-value	<0.0001	<0.0001	<0.0001	<0.0001
Resolution	--	0.2326	0.2233	0.2266
Cluster SE	--	(0.1020)	(0.1035)	(0.1066)
95% t interval	--	[0.032, 0.433]	[0.020, 0.427]	[0.017, 0.436]
p-value	--	0.0232	0.0317	0.0341
Intercept	0.8689	0.8628	Absorbed	Absorbed
Cluster SE	(0.0978)	(0.0978)	--	--
95% t interval	[0.677, 1.061]	[0.671, 1.055]	--	--
p-value	<0.0001	<0.0001	--	--
Calls	11,950	11,950	11,950	11,595
Firms / clusters	378	378	378	378
Calendar quarters	43	43	43	40
Overall R-squared	0.0054	0.0059	0.0562	0.0563
Adjusted overall R-sq.	0.0053	0.0057	0.0217	0.0210
Two-way partial R-sq.	--	--	0.0064	0.0066
Firm + quarter effects	No	No	Yes	Yes
Inference df (G - 1)	377	377	377	377

Outcome: 100 x winsorized CAR(0,1), in percentage points. Equal call weights; zero scores retained. SCRisk and Resolution retain the baseline uncentered population-SD units and 1%/99% clipping thresholds. R1 excludes adjudicated issuer fiscal year 2010 with the original thresholds.

Firm-clustered CR1 standard errors: $G/(G-1) \times (N-1)/(N-K)$, with K counting the full design rank, including fixed effects. Two-sided t inference uses G-1 degrees of freedom. The M3/R1 constant is absorbed in the fixed-effect span. No singleton or influence deletions.

Overall R-squared = $1 - SSE/SST$ around the outcome mean, including fixed effects. Adjusted overall R-squared uses N-K and N-1 degrees of freedom. Two-way partial R-squared = $1 - SSE/SS$ of the outcome after removing firm and calendar-quarter effects.

Calendar quarters use event_trading_date; eligible fiscal-2019 events released in 2020 remain. Corrected hardware baseline, common CAR/SIC-eligible sample. Planned analysis following descriptive exploration; not preregistered and not causal.
